Complexity for its own sake is not an inevitable  
guarantor of quality and mediocrity is not the  
inevitable consequence of simplicity.

*- Gerry Walker*

## SENTIENT Furniture Inc.

SENTIENT is a New York City based furniture design and fabrication company with more than 25,000 square feet of workshop facilities in Brooklyn. We have extensive experience manufacturing residential, commercial and hospitality furnishings including case goods and accent items. We have supplied furniture to the New York City area for decades and also foreign markets including Canada, United Kingdom and The Middle East.

SENTIENT Furniture is a furniture and objects design and fabrication firm with a philosophy that is found in the name. The word 'sentient' is defined as 'the power of perception', 'by sensation and consciousness'. On viewing our work we hope your consciousness is provoked by our expressive creations. At different times our work is subtle and relaxing. At other times it might be audacious and bold. In our drive for originality our work may include materials that are of limited supply or are not generally easy to work with. We believe this increases the uniqueness. On occasion some of our work will of necessity be available only on a limited basis.

We are always experimenting, prototyping and moving forward. Our collection is constantly changing and evolving. What works will stay, and what doesn't will be built on, learned from and improved.

## SENTIENT Philosophy

The philosophy of SENTIENT Furniture is found in the name. The word 'sentient' is defined as 'the power of perception by sensation and consciousness'. In one way or another our intention is to reach or alert our customers consciousness. We want our designs and products to be thought-provoking, curious, interesting and at times out-of-the-blue. The goal is to provoke a reaction. If a customer or observer comments, questions or asks for more information we have succeeded.

## Originality & Art

We strive to infuse artistic ideas and thoughts into our work. If a piece is going to be in your home and you are living with it everyday, then we feel we have responsibility to try to offer something a little different: perhaps in the juxtaposition of materials or shapes or colors. Whatever we include, it might not be the obvious choice but might result in something unique and truly special.

## Furniture As Art

At SENTIENT our drive is that each chair, table, credenza or bed that we create should be a strong statement of design. To us an object should awaken a sense even if its only to provoke a question. We try to add a little something so our collections and custom items are often perceived as art objects.
